

SAYED ALI SINA HUSSAINI

Kabul, Afghanistan | +93 (0) 74 5682 982 | sayedalisinahussaini@icloud.com

Skills Summary

I specialize in **Flutter** development, leveraging **Bloc** for robust state management and implementing advanced features like **platform channels**. Proficient in **Rust** for backend development, I also have extensive experience with **HTML**, **JavaScript/TypeScript**, **Tailwind CSS**, and **Tera** templates. Skilled in integrating diverse **APIs**, I possess working knowledge of **React** for foundational web projects.

Education

Bachelor of Computer Science / 2023

B.Sc. in Computer Science from Kateb University with a GPA of 3.0. Focused on software engineering, mobile development, and practical project work.

Experience

Laams LLC

Software Engineer Internship / 2023 – 2024

Worked with Flutter to develop cross-platform mobile features and actively contributed to projects using gRPC for efficient backend communication. Gained hands-on experience in modern app architecture and scalable service integration.

Freelance Full-Stack Development

Full-Stack Developer

Completed a full-featured e-visa platform for an Australian client — balivisasimplified.com — within 4 months using Rust, Tera templates, and Firebase. Delivered a secure, scalable backend and modern UI with real-time capabilities.

Tooti Sabz Company / 2024 – PRESENT

Software Developer

Front-End Developer at Tooti Sabz, working with Swift, Flutter, and WebRTC on the Tooti social platform.

Projects

Bali Visa Simplified

Bali Visa Simplified | HTML, Tailwind CSS, JavaScript, Rust, Tera Templates
| balivisasimplified.com

Led the development of Bali Visa Simplified, a streamlined visa application platform, utilizing HTML, Tailwind CSS, and JavaScript for a responsive and user-friendly front-end experience. Employed Rust with Tera templates for efficient backend development and templating, ensuring robust data processing and seamless user interactions, demonstrating strong leadership and technical expertise in delivering user-focused solutions.

Country Picker Plus

Country Picker Plus | Flutter, Dart
| pub.dev/packages/country_picker_plus | github.com/real-ali/country_picker_plus

Designed and developed Country Picker Plus, a versatile Flutter package published on pub.dev, enabling seamless country selection functionality for mobile and web applications. Leveraged Flutter and Dart to create a highly customizable and user-friendly package, demonstrating technical expertise and leadership in delivering a reusable, open-source solution for developers worldwide.

Markup Text

Markup Text | Flutter, Dart | pub.dev/packages/flutter_markup_text | github.com/real-ali/markup_text

Developed Markup Text, a robust Flutter package published on pub.dev, enabling developers to annotate text with markup tags for extracting and associating valuable information. Built with Flutter and Dart, this package provides a flexible and efficient solution for dynamic text processing, showcasing technical expertise and leadership in creating impactful, open-source tools for the developer community.

FCM Service

FCM Service | Rust | crates.io/crates/fcm-service | github.com/real-ali/fcm-service

Developed FCM Service, a Rust library published on crates.io, designed to simplify sending Firebase Cloud Messaging (FCM) notifications. Leveraged Rust's performance and safety features to create a reliable and efficient solution for push notification integration, demonstrating technical expertise and leadership in delivering valuable open-source tools for developers.
